The scientific journal for optometry and ophthalmology

Optometry and Contact Lenses (OCL)

Dear Ladies and Gentlemen,

Optometry & Contact Lenses (OCL) is the now 5-year-old journal of the Association of German Contact Lens Specialists and Optometrists (VDCO). By the end of 2025, 170 scientific and clinical articles have been published in OCL. Every publication in OCL undergoes a double-blind peer review process. This ensures the high clinical and scientific quality of OCL. The authors of the manuscripts submitted come from Germany, Great Britain, Canada, Malaysia, Mexico, Namibia, Austria, Switzerland, Spain, Slovenia, and the USA. Around eighty percent of the authors were from optometry – 20 percent from ophthalmology. The combination of a German-language print edition and a German- and English-language website with open access publications in English makes Optometry & Contact Lenses (OCL) an interesting and important scientific medium for national and international readers and authors from both eye care professions as well as the industry. As official journal of the Association of German Contact Lens Specialists and Optometrists (VDCO), OCL has a high national and international reputation. The aim of the journal can be summarised in five points as follows:

Readership: ophthalmic opticians, optometrists, ophthalmologists and doctors in further training to become ophthalmology specialists from Germany, Austria, Switzerland and other international countries as well as students of these disciplines.

Objective: OCL is dedicated to the overall complex of eyes and vision (Eye and Vision Care). OCL publishes scientific and clinical articles and case reports from the fields of ophthalmic optics, optometry, ophthalmology and related disciplines. In addition, it publishes interviews with well-known personalities of the disciplines, book reviews on current new publications from the field of Eye and Vision Care.

Relationship: The professional scientific journal is the official organ of the Association of German Contact Lens Specialists and Optometrists (VDCO). Each issue also contains VDCO association information.

Continuing Education: Each issue also includes a section on “Continuing Optometric Education (COE)-certified continuing education”. For successful completion of a COE-certified course in Optometry and Contact Lenses (OCL), the participant receives 1 COE continuing education point. The OCL Editorial Board selects the respective article; the questions are designed as multiple-choice tests according to the guidelines of the German Optometric Services Association (GOL). They can be answered online at the OCL website (see below).

Website: The website www.ocl-online.de and www.ocl-online.com contain all articles published in OCL Journal and are freely available to subscribers there. Individual sales of articles for non-subscribers are also guaranteed. The website is bilingual (German and English) to reach the international audience.

The DOZ publishing house and I are sure that OCL is a scientific journal, which gives the entire German-speaking ophthalmic optics an important and necessary impulse.
